

IntelliG Pro Series //

MODEL 3024

Belt or Chain Drive
Garage Door Opener

 Battery Backup Capable

ALWAYS AT YOUR COMMAND

Highlights

- **Quiet, strong performance** – 140 volt DC motor provides quiet yet strong performance with an opening speed of 7.5" per second*. Opener works on residential sectional garage doors up to 14' high, and one-piece doors up to 8' high.
- **Soft Start & Stop Control** – DC technology allows your door to begin and end its movement smoothly instead of abruptly whenever you operate it, creating less noise and less wear on the door.
- **Smart Illumination Lighting** – The 2-bulb system positions the light toward the inside of the garage instead of on the door for light where you need it most.
- **Assembled in the U.S.A.**
- **Dependable** – A Limited Lifetime warranty[†] on the motor and integrated gearbox shows how confident Genie is that your opener will perform when you need it to for years to come.
- **Power on Demand** – Refers to the ability of the opener to continually monitor the door's travel and deliver just the right amount of power for smooth and consistent movement.
- **GenieSense™ Monitoring** – Automatic force profiling & diagnostic technology improves safety by stopping operation when significant changes occur.
- **GENIE-NET™** – Intelligent internal platform allows the opener to expand its capability with great optional accessories.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage?

Genie — Always at Your Command!

* +/- 0.5 inches per second. Speed will slow with one-piece doors.
† Limited non-transferable warranty. See Operation & Maintenance manual for details.

Features & Benefits

POWER & CONTROL

DC Motor Smart Technology – The 140 volt DC motor offers quiet yet strong performance. The DC motor gives the ability to integrate Soft Start & Stop control, meaning the door begins and ends its travel smoothly instead of abruptly. This also helps create less noise and less wear and tear on your door.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Speed – The powerhead has an opening speed of 7.5 inches/second* to get you on your way faster.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Genie’s superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

Sure-Lock™ Control – Allows you to lock out remote controls and wireless keypad at any time for increased security – also known as a vacation lock.

CONVENIENCE

Smart Illumination – Light bulbs are positioned toward inside of garage instead of toward door for light where it’s needed most. Lights stay on for 4 minutes once opener is activated for ample time to get into house. Opener features bright lighting with (2) bulb capability. Genie branded LED light bulbs recommended. (If incandescent bulbs used, 100 watt max per bulb). See Genie LED bulb this page for additional details.

Auto Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatible – Works with current and ALL previous versions of HomeLink® or Car2U®. No additional external repeater kit or compatibility bridge needed.

Convenience Options

Genie® Garage Door Opener LED Bulb - NEW!

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs, which are being phased out due to energy inefficiency, can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn’t leave your garage in the dark!

Aladdin Connect™ Garage Door Controller

Gives ability to remotely monitor and change the position of your garage door from almost any smart device. The controller provides security and convenience. You’ll be able to know when someone is operating your door, or close it if your door status shows you left it open. You can even open it for a relative, babysitter, delivery, or repair person. Up to 3 doors can be monitored and 20 users added with one system.

Wireless Keypad

Mounts outside your door to give you keypad code access to your garage. Back-lit keypad lets you easily see the numbers. Controls up to 3 openers. Choose a color for the flip-up cover that best complements your home.

Battery Backup

Add this option and if the power goes out, Genie battery backup power goes on so you don’t have to manually open and close the garage door!

6’ Power Cord (Model 3024H)

Upgrade from standard 4’ power cord.

GENIE-NET™ PLATFORM

Genie-Net is the intelligent platform built into TriloG™ and IntelliG® Pro Series openers. When the **Network Adapter** is connected to one of the openers, it allows it to work with two great accessories. The **Closed Confirm® remote** notifies you when the door shuts by emitting a beep and flashing a green light. If the door reverses open, a warning tone sounds and a red light flashes. The **Intelligent Wall Console** features a back-lit LCD screen that provides easy-to-read info including date and time.
