

"World's finest, safest garage doors."™ Since 1936

DESIGN PATENTED

This photo:
Steel Pinnacle / Ash / Clear Windows

STEEL PINNACLE

- Martin's steel garage door looks exactly like wood, without the upkeep or cost.
- Stiles and rails are bolted together, not glued, not overlayed, so they cannot delaminate.
- True 3/4" panel depth.
- Angled stiles.

LOOKS
LIKE WOOD,
BUILT LIKE WOOD...
BUT COSTS
UP TO
40% LESS!

TABLE OF CONTENTS

Our premium doors and hardware provide quality and safety features unparalleled in the industry. See the Martin Advantage on page 59 for details.

7 CORNERSTONE

A photograph of a modern, two-story house. The upper level features a balcony with a silver metal railing. The main level has a large, light-colored wall with a horizontal wood grain pattern. A large, dark-colored garage door is visible on the left side of the main level. The house is surrounded by lush greenery, including trees and bushes. A small, green, modern-style lamp is visible in the foreground.

ADDITIONAL DOOR OPTIONS

Door Accessories

Customized features make Martin Garage Doors unique and individualized. Martin's many unique options and security features bring style and functionality to any door.

Mail Slots
Available in brass or brushed aluminum.
*cannot be painted.

Vents
Color matched with the rest of the door.

Outside T-Handle Lock
Color matched chrome, brass, or black.

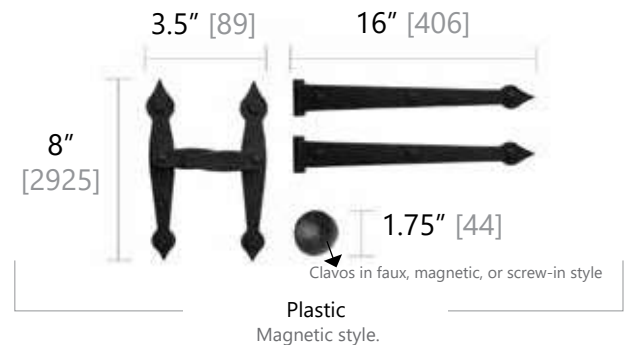

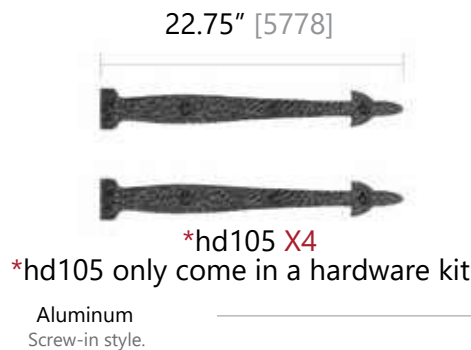

Vault Release
Allows you to open and close the door during power outage.

Inside Latch Lock
*padlock not included

Hardware Kits

Beautiful matching hinges and handles add a touch of charm to your garage door. Magnetic or screw-on handles, hinges, and clavos. Aluminum hardware can be powder coated.

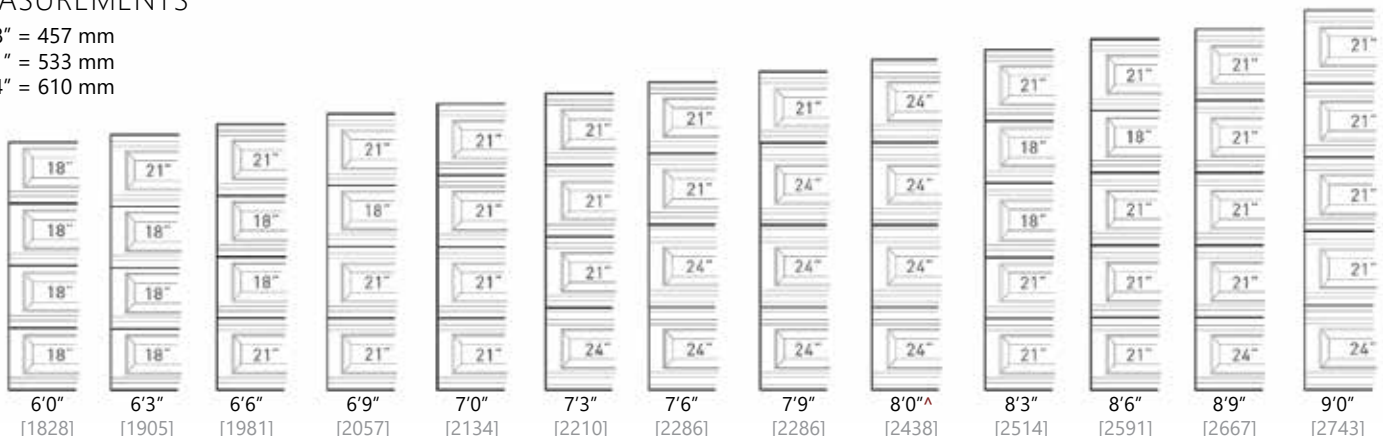

Door Height Examples

Tongue & Groove

Doors over 9' tall also available. Not all panel styles allow for windows. Choose Steel-framed windows for exact color match.

MEASUREMENTS

18" = 457 mm
21" = 533 mm
24" = 610 mm

^A Please note that 8' doors come in 4 sections unless 5 sections are specifically requested.

HARDWARE

Martin's hardware is long lasting, corrosion resistant, and has better safety features than the industry standard.

Spring

Center-mount springs have a high risk of explosive discharge due to spring torque. Martin's side-mounted Safety Spring system helps prevent accidents from happening. Side or center-mount springs are available on all doors.

Track & Roller

Martin track comes with hemmed edges and reduced hole size to help prevent injury. Martin rollers have precision sealed ball bearings, and are pre-lubricated for smooth use.

Hinge

Martin's premium low-profile safety hinge reduces the gap between sections.

Lift Cable

Martin's thicker 1/8" cable protects from breakage, and is located INSIDE low-clearance track, making your door safer.

Lock-On Bottom Bracket

If screws are removed while the springs are wound, the bracket will not move. Other brands do not have this safety feature.

Low Clearance

Can be modified on site to fit any clearance height.

THE MARTIN DOOR DIFFERENCE

MARTIN DOOR QUALITY

Superior Steel

We use 23-gauge high-tensile steel, which is stronger and harder to dent than industry standard steel. The steel is hot-dip galvanized with two layers of baked-on enamel paint for the longest life in the industry.

Superior Springs

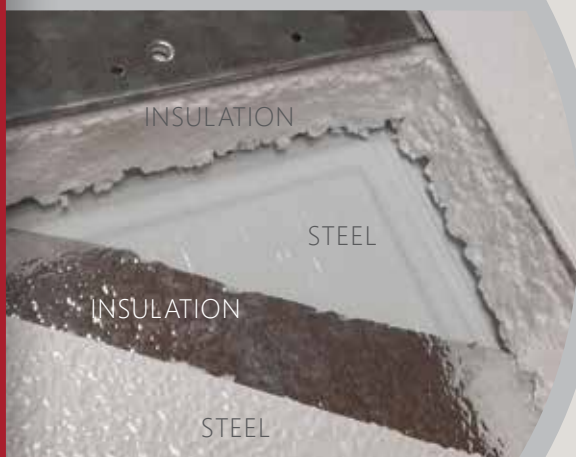

We use high-cycle galvanized springs that can last 20% to 66% longer and are cleaner than industry standard oil-tempered springs.

Superior Hardware

Martin hardware is tested to 100,000 cycles. We offer long-life features not offered by most manufacturers, including 10-gauge low-profile hinges, 1/8" thick steel cables, commercial-grade reverse angle, and roller brackets.

Superior Safety

Most Martin doors come with standard safety features not offered by other manufacturers, including pinch-proof joints, lock-on bottom bracket, concealed lift cables, and no sharp edges.

MARTIN DOOR LEAD TIMES

We offer the industry's fastest lead times.

MARTIN DOOR UNIQUE DESIGNS

We offer materials, designs, and colors that are as individual as your customer. From aluminum and steel carriage house doors, to smooth finish, or symmetrical raised-panel stamps on all door widths.

MARTIN DOOR LIMITED LIFETIME WARRANTY

We offer a Limited Lifetime Warranty on all doors, springs, and hardware - except Standard Doors and Standard Hardware.

MARTIN DOOR SERVICE

Our service team is second to none in responding to your questions and orders.

MARTIN DOOR INTANGIBLES

We do things differently to give you and your customers the greatest experience in ordering, producing, and delivering a custom and quality garage door - making the customer's home or business original and beautiful.

Faux On Faux VS. Faux On Steel

Faux on Faux

Assembled using full composite wood overlays. The end result is a beautiful door that looks like wood but requires much less maintenance.

Faux on Steel

Assembled using a Flush steel panel base and composite wood overlay. The final creation is a one of a kind garage door that has the beauty of wood, but is low maintenance.

PERFECT

Pinnacle Install
OUTSIDE

INSIDE

Imagine the possibilities!

The back of your custom door (including struts) can be powder-coated from a wide selection of colors for a clean, streamlined look.
